Career Objective

Aspiring Full Stack Web Developer with hands-on experience in HTML, CSS, JavaScript, Python, and SQL. Strong foundation in building responsive web applications and solving real-world problems through projects. Quick learner with excellent problem-solving skills, seeking an entry-level opportunity to contribute to innovative development teams. Passionate about creating user-friendly and efficient web solutions with clean and maintainable code. Eager to continuously learn new technologies and adapt to modern development practices in a dynamic work environment.

Education

Class 12, Mahboobia Junior College For Girls 2020- 2022
69% Nampally, Hyderabad

Class 10, GGHS Hyderguda 2020
93% Himayathnagar, Hyderabad

Internship / Training

Academy For Careers In Technology - By Freshworks 08/2025 - current

Responsibilities / Learning:

- Front-End Development/Back End Development/Full stack Web Development

Skills

- Front End Skills: HTML, CSS, Bootstrap
- Programming Language: JavaScript, Python
- Database: SQL
- Computer Applications: MS Word, MS Excel, PowerPoint.
- Tools: VS Code, Git, GitHub
- AI Tools/Platforms: ChatGPT, GitHub Copilot, Cursor, Antigravity
- Generative AI (Gen AI)
- MS Word, MS Excel, and PowerPoint
- Soft Skills: Adaptability, Teamwork, Communication Skills, Quick Learner, Problem-Solving.

Projects / Practical Work

SportsSphere (<https://tejbhuvana-hue.github.io/SportsSphere/>)

- SportsSphere is a web platform where sports players can create profiles and showcase their skills and achievements. It helps players get better opportunities by increasing their visibility.

Technologies: HTML, CSS, JavaScript, Python, SQL

Tools : VSCode, MySQL WorkBench

Box-Bite (<https://kavithamedida4-web.github.io/my-project-k/>)

- Box-Bite is a web-based platform that provides hygienic, home-style meals on a monthly basis, allowing users to explore, select, and also customize their food based on their preferences through a user-friendly interface.

Technologies: HTML, CSS, JavaScript

Tools: VSCode

Movie Hub Landing Page (<https://kavithamedida4-web.github.io/AI-Project-Landing-Page/>)

- Developed a responsive movie landing page called “Movie Hub” using HTML, CSS, and JavaScript with the help of AI tools. Designed a modern dark-themed UI with sections like navbar, hero, movies, and upcoming releases, and implemented basic interactivity such as hover effects and mobile navigation.
- Chess Game** (<https://kavithamedida4-web.github.io/AI-game-project/>)
- I used AI tools to generate the initial structure, then I understood the code and modified it. I worked on improving features like chess logic, minimax AI, and user interface interactions.
